SKILLS

- **Languages:** C, C++, JavaScript, Python
- **Technologies:** HTML, CSS, React,
- **Databases/Tools:** MySQL, PostgreSQL, Git, GitHub, Pandas, Numpy
- **Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability,

PROJECTS

Smart Drip Irrigation System(Hardware)

May 2026

- Developed a smart drip irrigation system using **Arduino Uno, ESP8266 Wi-Fi module, relay channel, battery, DC motor, resistors, and transistors** to automate plant irrigation based on environmental conditions.
- Integrated a **DHT22 temperature and humidity sensor** to monitor real-time environmental conditions and support data-driven irrigation decisions.
- Connected the hardware system with a **web-based monitoring and control platform**, enabling users to remotely monitor sensor data and control the irrigation system over Wi-Fi.
- Built the web interface using **HTML, CSS, React.js, and JavaScript**, providing an intuitive dashboard for monitoring sensor readings and controlling the irrigation system.
- Implemented **API-based communication** between the web application and hardware to transmit sensor data and irrigation control commands.
- Designed an automated irrigation workflow using environmental data to **reduce manual intervention and improve water-use efficiency**.
- **Tech Stack:** Arduino Uno, ESP8266, DHT22, Relay Module, DC Motor, HTML, CSS, React.js, JavaScript, APIs

Environmental Alert System | [GitHub](#)

Apr 2026

- Developed an environmental alert platform integrating multiple **APIs** to provide real-time information on weather, temperature, humidity, rainfall, air quality, and pollution levels.
- Integrated **weather and environmental APIs** to fetch and display live location-based data, enabling users to monitor changing weather and environmental conditions.
- Built an interactive dashboard using **React.js, JavaScript, HTML, and CSS**, presenting environmental data through charts, alerts, and visual indicators.
- Implemented an **environmental alert system** to identify critical weather and pollution conditions and provide timely information to users.
- Developed interactive **maps and data visualizations** to display location-based environmental conditions and pollution information.
- **Tech Stack:** React.js, JavaScript, HTML, CSS, REST APIs, Leaflet, Recharts

CERTIFICATES

- Introduction to Artificial Intelligence | [InfosysSpringboot](#)

Apr 2026

- Introduction to Python| [Saylor](#) May 2026
- C programming [Neo Colab](#) May 2026

EDUCATION

Lovely Professional University Shining Glorious Scholar Public School	Phagwara, Punjab
• Bachelor of Technology - Computer Science and Engineering; CGPA: 9.4	Aug 2025- Present
Shining Glorious Scholar Public School	Bhind ,M.P
Higher Secondary Education; Percentage: 79.8%	Jun 2024- Mar 2025
Shining Glorious Scholar Public School	Bhind,M.P
Secondary Education; Percentage: 84.2%	Jun 2022 - Mar 2023
